## Advancing Technology in Maryland

Westminster, MD, February 5, 2007 – Lighthouse Information Systems, Inc. and Tech Council of Maryland (TCM) have worked in collaboration in order to enhance membership and event software located at [www.techcouncilmd.com](http://www.techcouncilmd.com). These enhancements allow the technology community to efficiently use the TCM website in order to become part of many events held throughout Maryland.

Technology in Maryland is experiencing high interest and rapid growth. Tech Council of Maryland facilitates a large portion of technology growth through business opportunities and awareness through informative events. As the preeminent technology association in Maryland, TCM is an essential tool for any technology related business or organization. To learn more about their membership and events, please visit [www.techcouncilmd.com](http://www.techcouncilmd.com). Lighthouse Information Systems, Inc. provided the information management capacity necessary to meet the demands of TCM, and will continue to meet new challenges as Maryland technology continues to strengthen.

Lighthouse Information Systems, Inc. provides technology services to solve unique business needs through custom applications. Lighthouse solves business needs through software / database design, web / graphic design, technology consulting, and various hosting solutions. The mission that drives Lighthouse services is to partner with clients in order to understand their need and provide a solution that both meets that need and allows for their growth. Please visit [www.lhinfo.com](http://www.lhinfo.com) for more information.
